Rising Sun Engines, Inc.

Replacement Engines & Transmissions For Japanese Automobiles

Professionally Refurbished & Tested
Replacement Engines & Transmissions

Honda

Inspection

RSE, Inc. thoroughly inspects each "long-block" engine received from Japan. You re-use the external engine components in your vehicle.

Isuzu

Mazda

Wash & Clean

Each engine is thoroughly cleaned in our environmentally friendly "closed loop" jet-washing system. Touch up paint is also used as necessary to give your engine a "new" look.

Suzuki

Nissan

Dynamic Engine Testing

RSE, Inc. does not simply perform "crank testing" or "leak-down testing" on our engines. RSE, Inc. is possibly the only supplier of used Japanese engines that performs dynamic testing, we actually start and run the engine on a test bench. Every used and remanufactured engine is hot-run tested, compression tested, and oil pressure tested. Engines are test run on natural gas rather than gasoline to make sure that they burn clean. Dynamic testing like this also allows us to make sure that your engine runs quietly and smoke free.

Subaru

Toyota

Mitsubishi

Hyundai

Packaging & Shipping

Each engine & transmission is individually packaged. RSE, Inc. can deliver to all 50 states at exceptionally low rates.
